TAX CLEARANCE CERTIFICATE REQUIREMENTS

It is a condition of bid that the taxes of the successful bidder must be in order, or that satisfactory arrangements have been made with South African Revenue Service (SARS) to meet the bidder’s tax obligations.

1. In order to meet this requirement bidders are required to complete in full the attached form TCC 001 “Application for a Tax Clearance Certificate" and submit it to any SARS branch office nationally. The Tax Clearance Certificate Requirements are also applicable to foreign bidders / individuals who wish to submit bids.

2. SARS will then furnish the bidder with a Tax Clearance Certificate that will be valid for a period of 1 (one) year from the date of approval.

3. The original Tax Clearance Certificate must be submitted together with the bid. Failure to submit the original and valid Tax Clearance Certificate will result in the invalidation of the bid. Certified copies of the Tax Clearance Certificate will not be acceptable.

4. In bids where Consortia / Joint Ventures / Sub-contractors are involved, each party must submit a separate Tax Clearance Certificate.

6. Applications for the Tax Clearance Certificates may also be made via eFiling. In order to use this provision, taxpayers will need to register with SARS as eFilers through the website www.sars.gov.za.

1 This Standard Bidding Document (SBD) must form part of all bids¹ invited.

2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.

3 Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:

   a. disregard the bid of any bidder if that bidder, or any of its directors have abused the institution’s supply chain management system and or committed fraud or any other improper conduct in relation to such system.

   b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.

4 This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.

5 In order to give effect to the above, the attached Certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and/or services for purchasers who wish to acquire goods and/or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.

2. BACKGROUND

2.1. ABOUT THE NHBRC

2.1.1. Mandate of the NHBRC in terms of the Housing Consumers Protection Measures Act.

2.1.2. The National Home Builders Registration Council (NHBRC) has a mandate through the Housing Consumer Protection Measures Act (Act No. 95 of 1998) providing warranty protection against defects in new homes. The Act state that the objects of the Council are, inter alia:

3(b) “to regulate the home building industry”;

3(d) “to establish and promote ethical and technical standards in the home building industry”; and

3(e) “to improve structural quality in the interests of housing consumers and the home building industry”;

The Council is furthermore empowered by the Act:
5(5) (a) “to engage in undertakings to promote improved structural quality of homes constructed in the Republic;
5(5) (b) "to engage in undertakings to improve ethical and technical standards in the home building industry;
5(5) (c) “to keep a record of competent persons”; and
5(h) “to generally do all things necessary or expedient to achieve its objects and the objectives of this Act.”

3. RISK MANAGEMENT BY THE NHBRC

3.1. The NHBRC’s primary mandate is to manage the risk of structural defects in the home building industry and in so doing, protect the consumer. A prime activity of the NHBRC is to manage its risk exposure in terms of the warranty scheme, in order to ensure that it is not unduly exposed to claims. The current risk management tools being used by the Council include the Registration of Home Builders, enrolment and inspection of homes.

3.2. Despite the fact that a large amount of technical and legislative information on good house construction practices (i.e. the correct application of materials and technologies as well as the minimum standard requirements) is available, unacceptable construction quality is apparent throughout the entire spectrum of housing (i.e. low- to high income).

3.3. Observations by NHBRC over the years has revealed that:

3.3.1. Quality of construction in housing varied across the board;
3.3.2. The quality of the materials used does not meet standards in some instances;
3.3.3. Late enrolments or non-enrolment of homes with the NHBRC warranty scheme posed a risk of poor quality;
3.3.4. General poor workmanship and “cutting corners”;
3.3.5. Use of inappropriate materials and technologies; and
3.3.6. Lack of appropriate attention given to structural detailing.

3.4. In view of the above situation, it was apparent that there is a need for the development and introduction of a consistent, comprehensive and straightforward quality assessment system for house building in South Africa. This resulted in the development of Building Quality Index for Houses (BQIH), a tool being used by the NHBRC inspectors.

4. BUSINESS OVERVIEW

4.1. Purpose

4.1.1. The purpose of this project is to:-

- undertake a comprehensive review of the current Building Quality Index for Houses (BQIH) currently in use by the NHBRC inspectors;
- develop and implement a version 2 of BQIH, based on recent changes in industry best practise and trends;
• ensure the new system is capable of performing both during and post construction quality assessment of houses; and
• ensure the flexibility of the new system to account for non-conventional building technologies.

4.2. Scope of Work

4.2.1 In line with the above, NHBRC would like to review the current version of BQIH but still ensure that the tool maintains the current philosophy of quality assessment.

4.2.2 The scope of the project will be to:-
• review the current BQIH (A copy of which is attached hereto as Annexure A);
• research local and international best practice; and
• develop a comprehensive, quantitative, straight-forward and effective system, which will enable the user to assess all aspects of the construction which influence the quality of the 'end-product' i.e. the housing top structure.

4.2.3 The review must take into account all the changes that have happened in the Home Building Manual, the National Building Regulations, SANS 10400, International best practice, National Housing Norms and Standards etc.

4.2.4 The review and development process must be based on scientific research and statistical techniques, as well as the knowledge and expertise acquired in the home building industry.

4.3. Required Outputs

4.3.1 The output of this project is a BQIH system that:
• maintains the objective of a standard quality assessment system for house building,
• makes the quality assessment objective by measuring against standards and specifications,
• enables the assessment to be carried out scientifically and systematically, within reasonable cost and time;
• is aligned to all revisions of the Home Building Manual, SANS 10400, international best practices and other relevant standards;
• can be used during and post construction of house building;
• can be used for Innovative Building Technologies (IBT);
• is inclusive of the entire housing spectrum; and
• adaptable for computer applications.

4.4. Project Schedule

Due to the urgent nature of the project, NHBRC expects the duration of the project not to exceed six (6) months.
